

A framework to measure sustainability

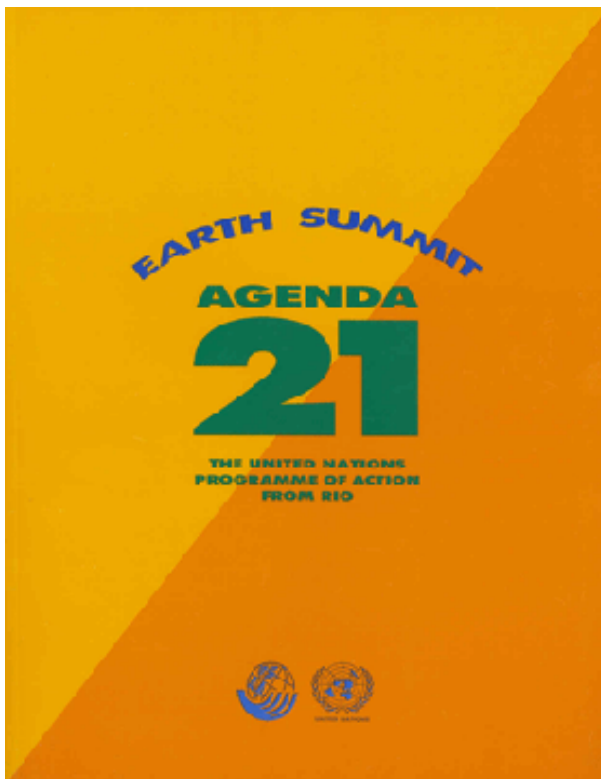

# Quantitative Sustainability

David Lusseau

# The Three Pillars

# How do we translate it for public & private sectors?

non-binding action plan

**1992-2000**

no timeline, indicators, nor targets

**2000-2015**

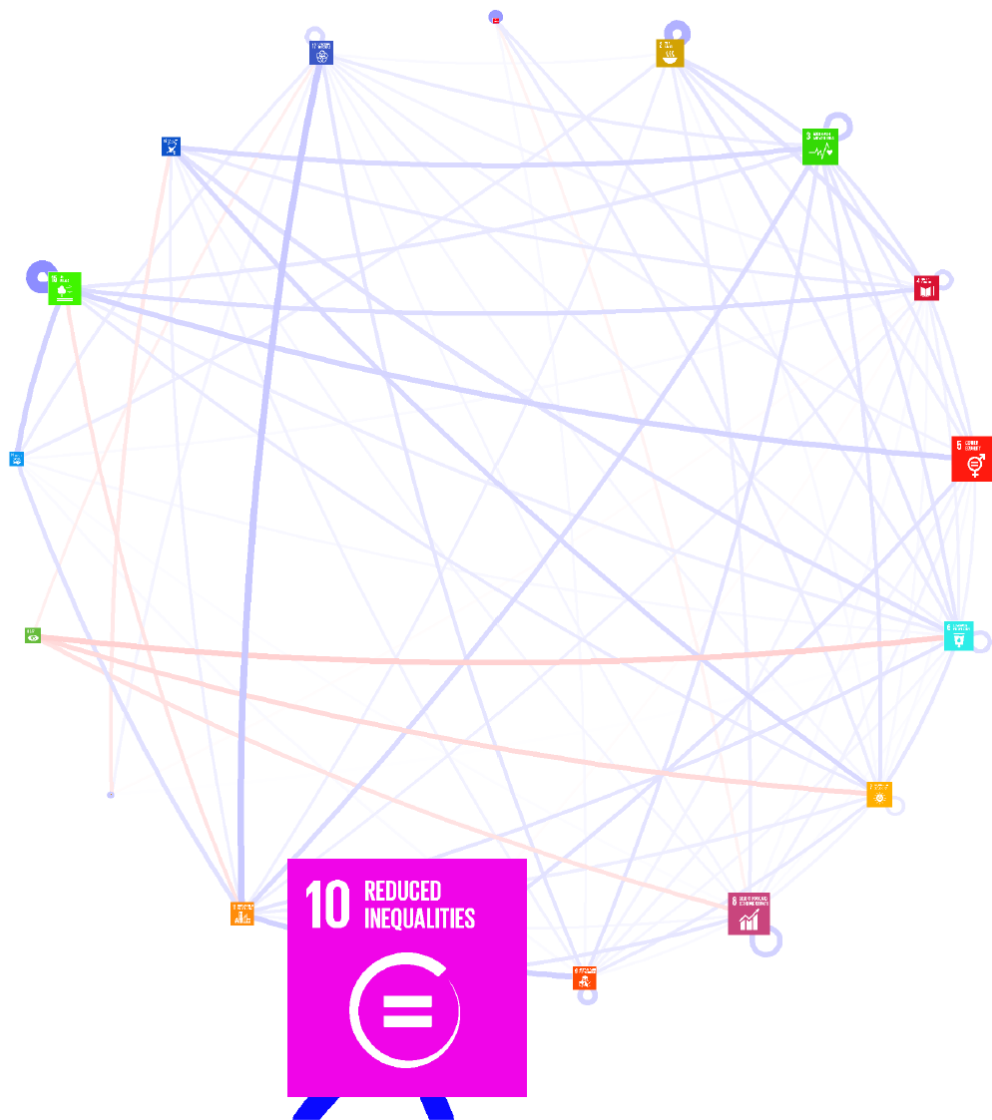

**2015-2030**

# Capturing the key dimensions of the problem

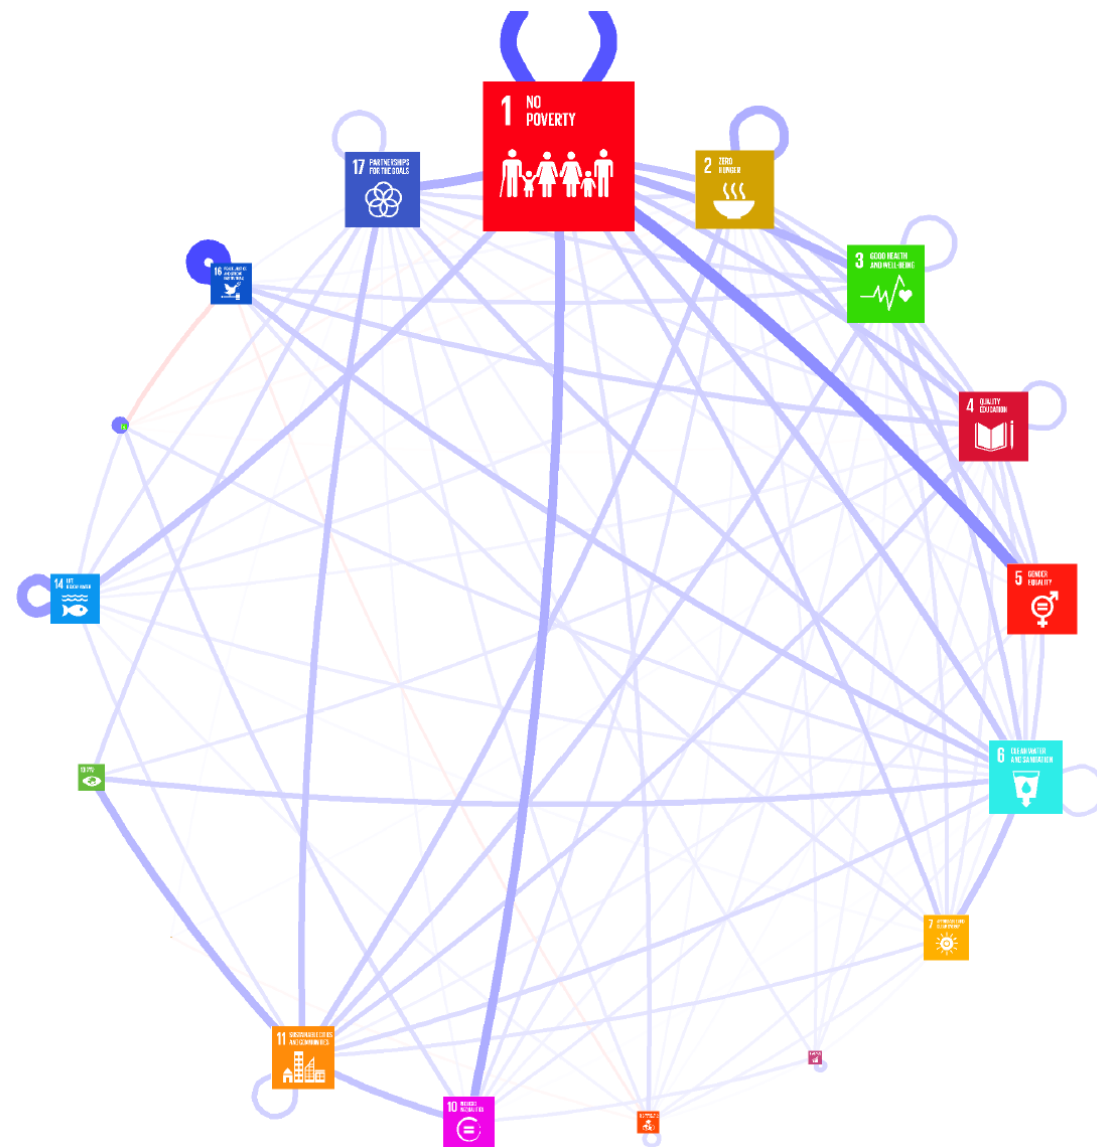

# The network of SDG interactions

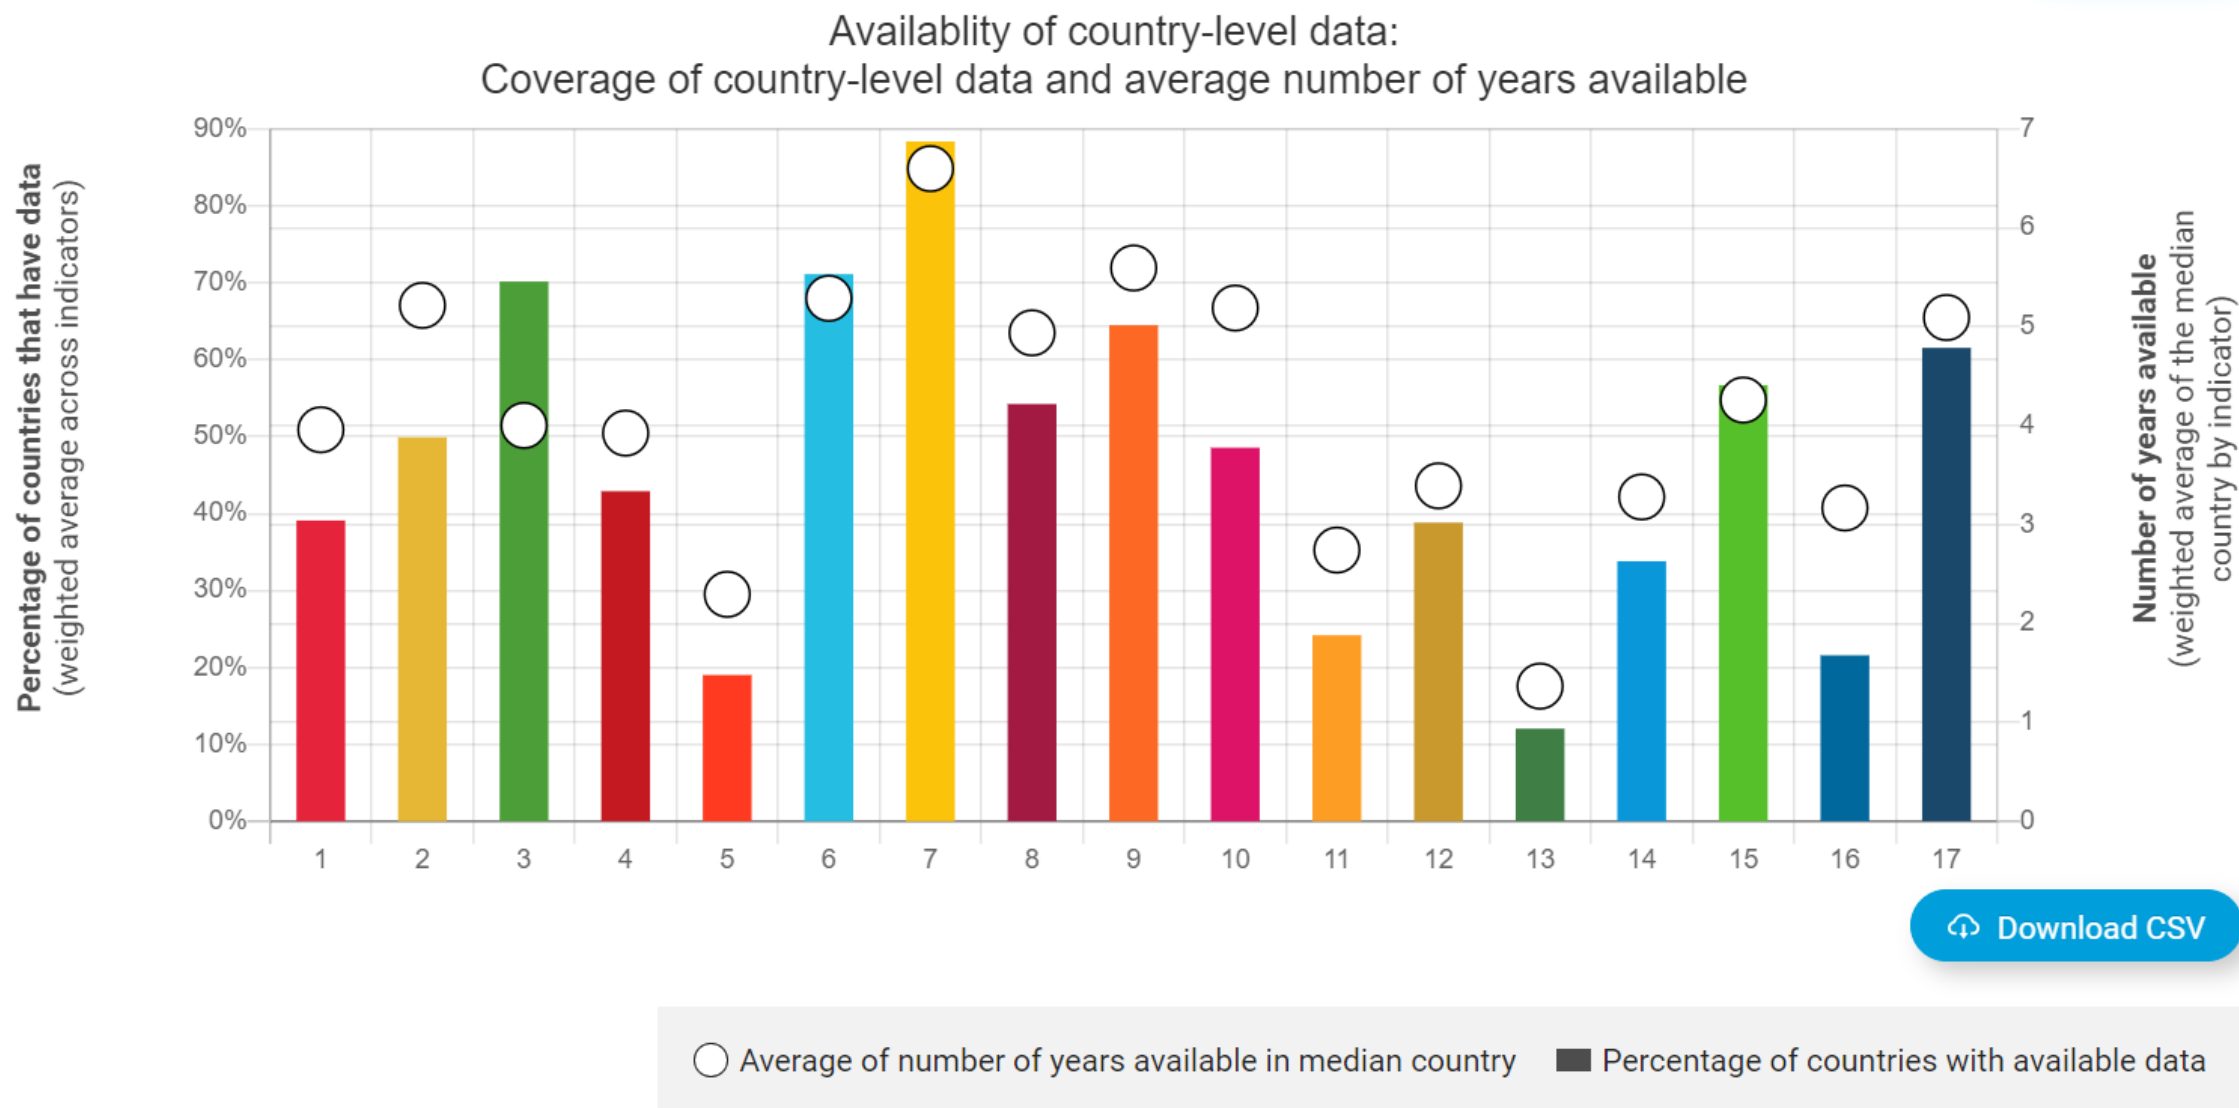

High-income countries

Low-income countries

# Data availability

# Conclusions

- We need S.M.A.R.T. objectives & targets
  - (Specific, Measurable, Achievable, Relevant & Time-Bound)
- They need to capture the three dimensions of sustainability
- Data remains sparse 30 years on
- Globally we still confuse ambitions and objectives
